Brock University, Ontario, CA.

The Challenge: Brock University purchased an old warehouse in St. Catherines and wanted to convert the building into a music school for their students, complete with a concert hall. The entire building was covered in lead-based paint and the cost of removal was too great to consider.

The Solution: The University decided on encasement of the entire interior of the building. This was more than 100,000 square feet of area to be encased. The system chosen was our FiberTech system which consisted of one coat of our F-50 Penetrating Stabilizer Primer followed by one coat of our F-51 Sealer Coat. The University was completely satisfied with the results.
